You must be logged in as an active Autodesk user with an Autocad Account. Once you have logged into your Autocad Account click on the File menu, and then click on New. The Autocad New Document dialog will open, where you can select the type of file you want to create. If you have your test source (.ai,.dwg,.dxf,.3dsmax,.stl) open in an editor, you can right-click on the file and select Save As. Click on Advanced Options and select the option that reads "Open a file to insert a layer. The selected file will be opened for editing." The New Draft dialog will open. Select A3 paper size from the Paper Size menu and select OK. Click on the Insert tab and click on Layer. The New Layer dialog will open. Click on Blank Layer. The New Layer dialog will close and a layer icon will appear on the Draft view. Click on the Layer Icon. The Layer dialog will open. Click on Blank Layer and enter a Name for the Layer. Click on OK and the Layer will appear in the Draft view. The next step is to insert 2d or 3d model you created. The best way to insert model into the drawing is to use the model of the surface. You can insert model from the Model menu. The Insert Model dialog will open. Click on the Line Style icon. The Line Style menu will open. The Current Line Style Options are displayed on the menu. The line style options are available in the app and desktop versions of Autocad. In the app version of Autocad, we have 12 line styles. The current style is displayed in the line style options as Current. If you want to see all the line style options on the menu you can click on the Add button and add a new line style. The Add Line Style dialog will open. Click on the Line Style drop down and select the line style you want to use from the list. Click on OK. The model will be inserted and the line style will be applied. After that, you can insert more layers
