For example, I sing "Lakum" by Aphex Twin, the AI version just given me "Uhmuuuh", or "Laili le ile" by Rihanna is a very cool singing, but in the vocal synthesis will be your voice as Rihanna. Etc. Microstudio - 11/08/2015 Added two voices for Sepultura. Also updated your voice. **CLICKME** - 06/13/2015 Good, I only want to make the vocals sound more natural. There is also a dedicated Pause button for audio tracks. When selecting a track, there is an indication of the length of each selected track, so that you know if you are pressing the Play button for the track, the cover track of the CD, or you are skipping to the previous track. When using the slider to adjust the Master gain level of the output, you have to be aware of the fact that the slider is not continuous. Pressing the right or left arrow key will not change the Master gain level. Instead, you need to press the down or up arrow keys to decrease or increase it, respectively. Digital effects are applied to a track and you can fine-tune the parameters of the effects. Download Microstudio for your Windows Phone. You know it. You love it.
