You can purchase either the Standard Edition (\$8.99/Year) or Student Edition (\$4.99/Year). Most major retailers offer discounts on the Standard or Student Editions. Make sure you know your license type before purchasing. Standard Editions are subject to updates and upgrades for free and do not expire. Student Editions have 2-years of updates and upgrades. You can upgrade from your previous version of Photoshop Elements once your license is active. You can always review what's new in Photoshop Elements for your version here. Adobe Photoshop Elements is the simplest and most popular image editor for photographers, graphic designers, web designers, or anyone who edits photos, graphics and web content. It is available on Windows, Mac, iOS and Android for just \$8.99 (or \$4.99 for Students). To start, choose Open and navigate to the location you would like to open the image. Alternatively, you can use the File Open button located at the top of the screen. Then, select your image from the options by clicking on the image. Then, select Image > Adjustments > Curves. Using the Power slider, drag the curve to customize the curve. Now, drag the left and right anchor points. This will help you shape the curve. Use the Tension slider to fine tune the curve. If you have any problems, watch our quick tutorial. The Curves Tool in Photoshop Elements is a powerful and widely used tool. Photoshop Elements 13 comes with even more powerful, 3D Curves in Photoshop that works the way you've come to know and love. Sliders are replaced with three new 3D Curves, which can now be used to create images with any degree of dimension. Choose any image and open it by clicking the Open button on the top right of the image window. Then, select Image > Adjustments > Curves. Using the 3D Sliders, create the desired curve shape by dragging the yellow handles on the left and right sides of the image. Adjust the shape of the curve by changing the position of the handles on the right and left side of the curve. Use the Curves tension slider to fine-tune the curve. You can save the curve by selecting 05a79cecff
